Enhanced Safety

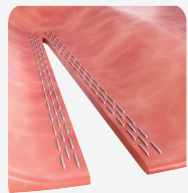

One-touch firing, minimal effort required.

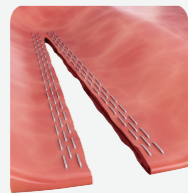

Enhancing precision by minimizing tissue movement, resulting in smoother cutting, improved staple formation, and ultimately, superior anastomosis.

Tempered Steel Blade

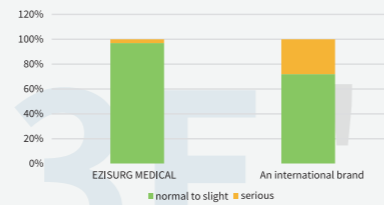

easyEndo™ E-lite blade (500Hv)

Others (≤400Hv)

Premium stainless steel blade, 20% harder guarantees multiple smooth cuts and a precise staple line, enhancing safety and reliability.

Sharper blade, 97% without severe rough edge to reduce bleeding (500 Hv)

Ergonomic Design

Lightweight

0600g

This weight is subject to model 60mm

13%-62.5% less than powered staplers in the industry, reduce pressure on wrist, ensuring comfort during prolonged use.

Comfortable Ergonomic Design

Practical insights from experienced surgeons

"It is very light and handy, very easy to operate compared to others."
—Surgeon, Linköping University Hospital, Sweden

"The design of the easyEndo™ E-lite is very simple and easy to use."
—Surgeon, AZ Voorkepen Hospital, Belgium

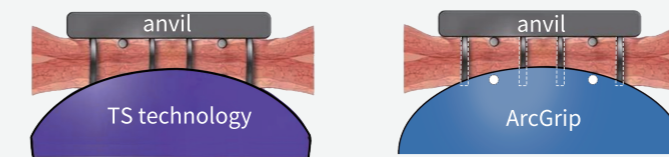

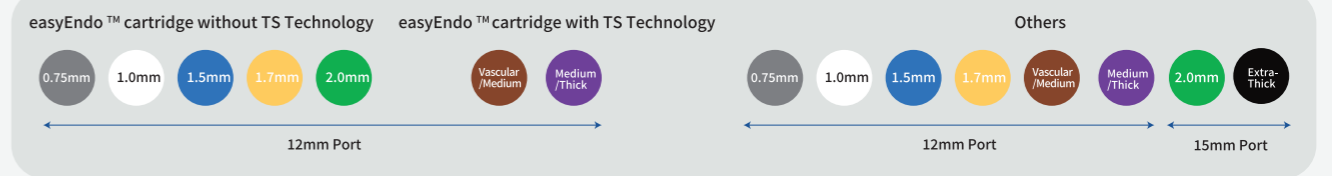

"Perfect staple line, with this great product I can finish the operation during short time."
—Surgeon, Clinique Champeau Méditerranée, France

"It's very easy to handle and the performance of stapler is outstanding."
—Surgeon, APHP Saint Antoine, France

Economic Operation

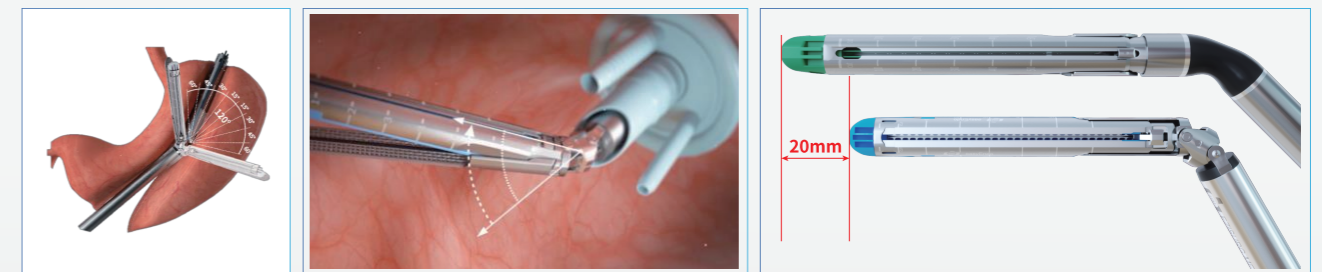

Reducing Potential Injury

All models are accessible via a 12mm trocar, reducing operation costs and the potential for injury by eliminating the need to change between multiple trocars

Easier Accessibility and Maneuverability

The combination of 120° articulation angle and shortened jaw length improves accessibility and maneuverability, contributing to efficient operation.

Jaw length 20+mm shorter than most competitors in the industry.
